

NTT DATA

NTT DATA welcomed Dell Services into the family in 2016. Together, we offer one of the industry's most comprehensive services portfolios designed to modernize business and technology to deliver the outcomes that matter most to our clients.

Transform Your Organization Into an Agile, Software-Driven Enterprise

NTT DATA Application Services for Pivotal Cloud Foundry

NTT DATA Services
formerly Dell Services

Accelerate business processes, reduce costs, build responsive IT and deliver innovation on the Pivotal Cloud Foundry platform.

Bridge the gap between business expectations and IT capabilities

Software development is key to achieving a competitive advantage — and a new generation of developers is using innovative technologies like cloud to help you stay relevant in the digital world. These developers work in agile teams and need a platform that enables continuous delivery updates, powerful data integration and analytics capabilities, as well as the ability to scale applications horizontally with no downtime.

An enterprise platform as a service (PaaS) can help you meet these needs and more. Purpose built for continuous delivery and horizontal architectures, Pivotal Cloud Foundry allows developers to focus on the application as a unit of deployment and scale, not infrastructure. It provides an abstraction layer that enables you to make infrastructure choices based on price, performance, location and efficiency.

As a key Pivotal and VMware partner, NTT DATA has developed a portfolio of services and tools for the enterprise cloud with solutions tailored to meet your unique goals and requirements.

Key benefits:

- Improve business agility and time to market
- Reduce costs while unlocking the potential to deliver IT innovation
- Improve the customer experience by finding new ways to engage customers
- Achieve responsive IT and increase productivity for development and IT operations
- Provide a common architecture and platform for all applications, with granular IT control

Choose a trusted partner for Pivotal Cloud Foundry solutions

NTT DATA can help you become a modern, software-driven organization with a full suite of services, including:

Transformation services:

- Identify applications best suited for Pivotal Cloud Foundry deployment, while realizing the business benefits of PaaS
- Deploy Pivotal Cloud Foundry on your existing on-premises private cloud infrastructure or supported public cloud infrastructure-as-a-service platforms — VMware vCloud Air, Amazon Web Services and OpenStack
- Assess and migrate your existing applications to Pivotal Cloud Foundry that do not need considerable changes to the application design, architecture and/or codebase
- Modernize and deploy existing legacy applications on Pivotal Cloud Foundry

Development services:

- Design, develop, integrate and test new custom applications for deployment on Pivotal Cloud Foundry
- Re-architect your existing applications that need considerable changes before deploying to Pivotal Cloud Foundry

Management services:

- Support deployments with a global help desk, self-service portal and a dedicated team
- Manage deployments with robust protection, monitoring, governance and automation

End-to-end cloud application services for comprehensive support

Our consultants can help you envision, enable and execute your journey to adopting PaaS. We can provide you with:

- Assistance at all stages of the PaaS adoption lifecycle — from initial concept through development and testing, and management and support
- In-depth insights into Pivotal Cloud Foundry and early access to new features and capabilities through our strong relationship with Pivotal
- Flexible and scalable solutions, utilizing existing infrastructure investments and application integrations
- Solution centers to help you explore performance, security, governance and other PaaS considerations
- Skilled, dedicated professionals who specialize in Pivotal Cloud Foundry-based application development and deployments
- Proprietary tools for monitoring, scaling, notifications, security, software-as-a-service enablement, data management and other key enterprise cloud management functions

About NTT DATA Digital Business Services

Digital Business Services enables digital transformation for customers by taking a business-first approach. We use a robust consulting methodology to create digital strategy roadmaps for organizations, enabling new revenue models, exceptional customer engagement and superior operational excellence. Our services use digital technologies, including analytics, mobile, social media, cloud and Internet of Things, to deliver end-to-end client solutions.
